

DermTech Announces Preferred Provider Agreements

with TriCare and ACPN and Credentialing by UnitedHealthcare

La Jolla (May 2, 2016) – DermTech, Inc., an emerging diagnostics company focusing on non-invasive gene expression tests for skin cancer and inflammatory diseases, announced today it has completed contracts for payment with Tricare and America’s Choice Provider Network. Additionally, DermTech announced it has received credentialing approval from UnitedHealthcare for participation as a network provider. Tricare provides coverage to nearly 9.4 million beneficiaries in the military health system. ACPN’s multi-specialty network provides access to over 24 million Americans. UnitedHealthcare provides health care access to more than 27.5 million Americans.

Steve Kemper, the company’s CFO, stated: “These agreements support our commitment to growth as an in-network participating provider. We continue to execute our strategy to commercialize our non-invasive test for the detection of melanoma, the first test utilizing our novel adhesive biopsy platform.”

About DermTech

DermTech is a commercial stage molecular dermatology company developing non-invasive gene expression tests to aid the clinical diagnosis of skin cancer and inflammatory skin conditions. DermTech operates a CLIA licensed laboratory located in the company’s La Jolla, CA headquarters. DermTech’s technology allows the analysis of skin biopsy samples collected *non-invasively* using an adhesive patch. DermTech provides highly accurate, objective information to the physicians to improve care and reduce costs. Current dermatologic diagnosis is primarily based on subjective visual pattern recognition that is prone to error and results in a substantial number of unnecessary surgical procedures.
